

National Technical University of Ukraine “Kyiv Polytechnic Institute”: new opportunities in the field of nuclear energy training

Training of specialists for nuclear power generation industry in NTUU “KPI” is conducted by Faculty of Heat Power Engineering that is leading scientific and educational division of the system of technical universities of Ukraine in the field of nuclear power generation industry, thermal physics and power engineering industry.

Background information

Faculty of Heat Power Engineering was established in 1931.

Educational, methodological and scientific activity of the faculty is provided by five departments:

- Nuclear Power Plants and Thermal Physics Engineering;
- Theoretical and Industrial Thermal Engineering;
- Thermal Power Plants and Nuclear Power Plants;
- Automation of Thermal Power Processes;
- Design Automation of Energy Processes and Systems.

Training of specialists in faculty is conducting in 10 specializations. Total number of students exceeds 2000.

The teaching languages in the faculty traditionally include English.

Educational process is provided by highly qualified professors and teaching and support staff in the overall composition of 241 persons. Among them: 19 professors, 64 associate professors, 36 senior lecturers, 19 assistants and 103 persons of teaching and support staff.
